In home visit: A home visit consultation usually takes 1.5-2hrs and we will first itemize the issues that you are currently dealing with and prioritize them. We discuss why the dog is exhibiting these behaviors, how to better understand them, when and how to correct it. Then we will actually try to elicit some of the behaviors and practice correcting them. Lastly, I will write down the details of the plan. Home visits can be used for correcting bad behaviors, anxiety issues, remote collar training, a prelude to attending class with a reactive dog and more . While most clients find that they are confident enough with the training plan moving forward to cover future situations if you wish follow up visits they are sold in 30 minute increments (as many as you'd like). .

If you wish to learn remote collar training, then the collar I recommend is the Sportdog 425x (do NOT get the 425 xs or the one that is the color camo)

If you decide to move forward with an In Home visit you need to get back with me with a list of the behaviors we'd be working on, some days/times that are good for you(remember I'll need a 2 hour window), and your home address.

I look forward to working with you.

Sincerely,

Karen Vaden
